## Importance of Planning for Retirement

## Why Is It Important to Plan Ahead for Retirement?

Some people think that retirement planning isn't important because they won't live until retirement.

## Consider...

| Of 100 Men<br>Who Are Age: | Their Odds of Living to<br>Retirement at Age 65<br>Are: | Of 100 Woman<br>Who Are Age: | Their Odds of Living<br>to Retirement at<br>Age 65 Are: |
|----------------------------|---|------------------------------|---|
| 30                         | 84%   | 30                           | 87%   |
| 40                         | 85%   | 40                           | 88%   |
| 50                         | 88%   | 50                           | 90%   |
| 60                         | 94%   | 60                           | 95%   |

Not only will the vast majority of us live to reach retirement at age 65, but with advances in medical technology, we can also expect to live a substantial number of years after retirement.

## Consider...

| A Man Who Is<br>Currently Age: | Has a Life<br>Expectancy of Age: | A Woman Who Is<br>Currently Age: | Has a Life<br>Expectancy of<br>Age: |
|--------------------------------|----------------------------------|----------------------------------|-------------------------------------|
| 30                             | 78                               | 30                               | 82                                  |
| 40                             | 78                               | 40                               | 82                                  |
| 50                             | 79                               | 50                               | 83                                  |
| 60                             | 81                               | 60                               | 84                                  |
| 65                             | 82                               | 65                               | 85                                  |
