

Impact of Inflation on College Costs

What Is the Impact of Inflation on College Costs?

Unfortunately, college costs have historically been rising at a faster rate than the general inflation rate.

Over the decade between 2012-13 and 2022-23, average inflation-adjusted tuition and fees declined by 1% at public four-year institutions and increased by 6% at private nonprofit four-year institutions? (source: The College Board Trends in College Pricing 2022).

Failing to consider the impact of inflation on college costs could undermine your ability to provide for your child's education.

Consider the funds that may be needed when an 8-year-old child is ready to attend college on a full-time basis in 10 years:
